## IT SECURITY, SURVEILLANCE & OFFICE AUTOMATION SERVICES WE OFFER

With our electronic security and automation technologies, we provide one-stop technological solutions to make homes and businesses smarter, safer, and more productive. With the support of cutting-edge electronic security and automation systems, Aprilent Systems assists individuals and organisations worldwide in securing their lives and places of business.

Our expertise includes offering service and support for application development, cross-platform applications, application interoperability, integrated solutions, biometric solutions, surveillance systems, and providing networking solutions. We also provide and maintain high-pro le security systems.

We provide top-notch products from manufacturers that are authorities in the elds of automation and electronic security.

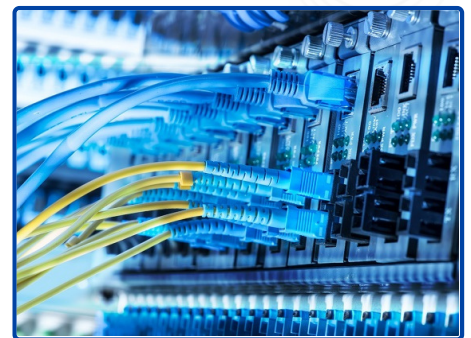

### Biometric Time & Attendance

We use the most recent biometric, RFID, and UHF technologies to offer solutions that may be integrated for gathering security or attendance data in order to assure reliable, impartial reporting.

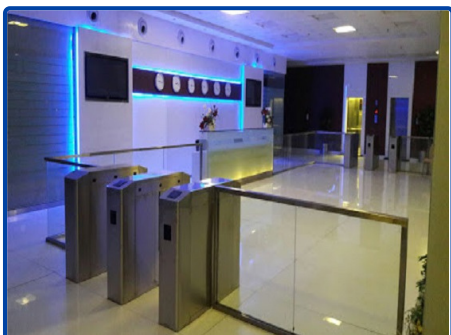

### HD & IP CCTV Surveillance

As a pioneer and industry leader in several HD & IP CCTV surveillance solutions, Aprilent. Our solutions have been used by both big and small businesses in a variety of industries.

### Enterprise Network Solutions

Our information and communications technology consulting guarantees that technology not only complies with specifications but is also installed and managed to deliver on its promises.

### Advanced Access Control

We provide access control system that keeps intruders out and prohibits them from accessing resources by identifying them as unauthorised individuals using biometric authentication.

### IPBX/EPABX Intercom System

The EPABX system resembles a small telephone exchange in certain ways. It has a tonne of incredible features, like conference calling, recording, auto-answering, multi- functional lines, and auto-dialing.

### Software Development

In accordance with customer needs, we create & integrate business growth software. For application across a variety of sectors, we design and implement reliable, scalable, and extendable infrastructures.

## SOFTWARE SERVICES WE OFFER

In Odisha, Aprilent Systems Pvt. Ltd. is one of the top software firms. It is renowned for providing top-notch services to its customers. We provide scalable, cost-efficient, and quality-focused solutions to help our clients and partners achieve remarkable business outcomes. The latter offers a variety of tailored solutions in numerous fields and is one of the top talent development companies in the globe. The business has come a long way since its inception and carved out a position for itself in the Indian industry. It is recognised as one of the innovators in India for disseminating superior solutions and services. Even the most rural parts of the country now have ASPL clients. Due to its innovative services, ASPL has formed partnerships with numerous esteemed companies.

### EMPLOYEE TIME & ATTENDANCE SOFTWARE

Powerful time and attendance software for numerous industries. Learn about workforce analytics in real time. With one comprehensive solution, manage your employees' attendance, records, shifts, overtime, and leave.

### EMPLOYEE SELF SERVICE / MOBILE APP

Organizations need the Employee Self Service (ESS) App to enable their personnel to work while on the go. Using your team's real-time information, optimise your eld operations.

### HRMS & PAYROLL SOFTWARE ON CLOUD

Advanced Payroll Software to handle complicated salary calculations, automate statutory calculations and MIS reports for ease of statutory lings and numerous operations.

### CONTRACT LABOUR MANAGEMENT SYSTEM

The Contract Labour Management System was created particularly for businesses that depend on contract labour. Managers and contractors may effectively organise and manage their staff using the CLMS Application, which will increase productivity and drastically save labour costs.

### VISITOR MANAGEMENT SOFTWARE

With our guest management system, you can improve the visitor registration process and guarantee a secure working environment for your staff, visitors, and contractors.

### CANTEEN MANAGEMENT SOFTWARE

A comprehensive record of the food supplied in the cafeteria is kept by Canteen Management Software, an automated programme that facilitates all canteen operations. It enables quick and secure transactions. By cutting down on client wait times, it helps management control the users.
